Case Study: Bel and The Dragon, Reading

www.belandthedragon.co.uk

Outline

This Thames boathouse conversion was the third Bel and the Dragon project for CGA Integration, following Cookham and Windsor installations. The restaurant specified reliable, high quality background dining music with simple management controls across five zones in three clear internal areas.

Challenges

The spacious interior and high ceiling of the dining area was a difficult audio environment to provide direct sound to.

Each table needed intimate sound to complement the mood and dining, complicated by remote speaker locations and a reverberent room. Interior decoration was also of a very high standard, requiring non intrusive speaker locations and stylish cabinets.

Technical

Electrovoice EVID speakers feature sleek, stylish cabinets allowing them to blend into high quality décor. Coupled to Cloud and EV amps, they provided clear intimate sound to all areas. Remote controls allowed fine tuning by management for each zone.
